

Thank you for the purchase of a Mako Compressor from Sandry Fire Supply. The following is a short guideline of recommended service:

Mako Genuine OEM parts provide reliability you need and cannot afford to do without. Don't take a chance on alternatives, choose genuine Mako OEM parts that are dependable and will help maintain performance advantage. All consumable and proprietary parts are designed especially for Mako products.

Mako Blue Lubricant is formulated from environmentally responsible components that are produced and designed to assure optimum performance of your compression systems. Our formulations are designed to maximize renewable content that exceeds USDA standards for renewable products.

Mako Blue Lubricant Features include:

Formulated to provide longevity and reliability for the compressor pump unit

- Designed and developed to deliver uncompromising engineering excellence
- Protection for ultimate life cycle performance

Mako recommends annual servicing of MAKO Compressors by certified technicians. A non-MAKO certified annual service will void the warranty.

Sandry Fire Supply has set an annual service schedule for you and will send you an email 6 weeks before to confirm service. If you have issues with your compressor, please call us to help trouble shoot and get your compressor repaired if needed.

**Your annual service schedule is the week of .**
